

Andrew Konkol (Panelist)

Andrew Konkol is the maintenance manager at Harley-Davidson's Powertrain manufacturing plant. In this role, Andrew leads a team of supervisors, engineers, and skilled journeymen in providing all aspects of asset care, including the use of predictive technologies, preventative maintenance, and emergent work in support of the plant's \$700 million+ asset base. Andrew completed his undergraduate work at the University of Wisconsin (UW)-Stevens Point and later received a master's degree from UW-Oshkosh. His varied technical and leadership experiences provided a strong foundation for his maintenance manager position. Prior to his current role, Andrew spent 10 years at Harley-Davidson in positions with the assembly line, steel machining, charging systems, and in a support function for the paint and injection molding operation at Harley's Tomahawk facility. Passionate about manufacturing and its possibilities, Andrew provides leadership that supports the growth of internal technical competencies, develops future leaders, and is centered on problem solving.
