

Director, Accessibility Compliance

The New York City School Construction Authority builds and renovates public schools throughout all of the boroughs. We believe that schools should be efficiently designed and constructed; they should be safe, attractive and environmentally sound. The SCA's responsibilities span the life of each project (new schools, additions, and capital improvements to existing schools) from planning, real estate, budgeting, scoping, and designing, to construction completion.

The NYC School Construction Authority is looking for a qualified individual to direct the SCA's Accessibility Compliance program. The candidate must have a baccalaureate degree from an accredited college or university & a minimum of 10 years of experience in design, construction, management or related field, five of which must be in an administrative or managerial capacity. They must have a deep understanding of the American with Disabilities Act technical requirements as well as scoping requirements. Goal-driven problem solving, and being able to think out of the box is critical.

Responsibilities include implementing the accessibility provisions of the NYC Building Code, ADAG, and all other local, state, and federal mandates as they relate to accessibility; review of documents for compliance with such rules and laws, providing expert advice to the agency; providing staff development, and representing the SCA on intergovernmental committees on matters of accessibility.

We offer excellent benefits including medical, dental, prescription and vision coverage; retirement savings plans including pension, 401K, 457 and IRA options and generous paid time off are just a sample of our benefits. Salary range \$100,777.00 - \$174,685.00 annually.
