

Position Announcement: Director, Master of Engineering Management Program
Thayer School of Engineering at Dartmouth College

The Master of Engineering Management (MEM) program at Dartmouth is an immersive experience for engineering and science graduates who seek to become leaders in businesses and organizations driven by technology. We are looking for our next Director.

The Director of the MEM Program is responsible for working with the MEM Executive Director for ongoing delivery, maintenance, growth, and evolution of the MEM Program; working in collaboration with Thayer School faculty, staff, and administration to identify and prepare the next generation of MEM program graduate leaders to engage with industry in corporate-sponsored class projects, in finding summer internships, and in obtaining full-time job placements in which they are prepared to solve problems through engineering thinking, research, and innovation, with a human-centered impact; reaching beyond Thayer School to inspire and deliver mutually beneficial and collaborative experiences such as student exchanges with Dartmouth, as well as with other graduate and professional schools. To accomplish this mission, the Director of the MEM Program will also work closely with the Director of Industry Engagement, the Admissions Marketing Director, Admissions Director, and the MEM Program Coordinator.

Interested applicants should submit a cover letter and current resume at this link:
